

Loyalty Card Wallet - Mero Loyalty

App	Ratings	Reviews	Features	Downloads
 Fidme Loyalty Cards & Cashback	4.5/5	All my loyalty cards are on Fidme. Very practical, everything is on the phone and there are no more cards cluttering my bag. It's really difficult to add cards. If the retailer isn't listed, adding a card can be complicated and the customization options are limited. Since a recent update, I am unable to add new cards.	Digital Loyalty Cards – Store and manage multiple loyalty cards in one mobile wallet. Card Scanning – Scan barcodes, QR codes, ID cards, and stamp cards using a phone. Digital Receipts – Scan, store, organize, and search purchase receipts. Deals & Coupons – Discover discounts, coupons, cashback offers, and promotions. Rewards & Points – Earn points/stamps through purchases and app activities and redeem them for rewards. Store & Offer Discovery – Find nearby stores and their latest deals and promotions. Notifications & Alerts – Receive alerts about new discounts, flash sales, products, and favorite brands.	1M+
 Catima	4.6/5	This app is what I've been looking for. I don't have to carry around cards anymore. FREE! Open source! No Ads! WONDERFUL! ... You can also track points or currency, add expiration dates, and import/export your data. The POS successfully scanned the barcode from Catima, but rejected it. The physical gift card worked fine.	Avoid spying with very few permissions. No Internet access and no ads. - Add cards or codes with names and customizable colours. - Manual code entry if there is no barcode to store, or it can't be used. - Import cards and codes from files, Catima, FidMe, Loyalty Card Keychain and Voucher Vault. - Make a backup of all your cards and transfer them to a new device if you want. - Share coupons, exclusive offers, promo codes, or cards and codes using any app. - Dark theme and accessibility options for vision impaired users. - Made for everyone by the libre software community. - Localized hand-made translations for 40+ languages. - Gratis, supported by community contributions.	100K+

			- Use, study, change and share it as you wish; <i>with all</i>. - Not only Free Software / Open Source. <i>Copylefted</i> libre software (GPLv3+) card management.	
 Stocard – Loyalty Card Wallet	4.7/5	Super simple, does one job well. Keeps all my loyalty cards in one place on my phone, so I don't need to carry them around. I used to use Stocard but have not been happy since it force-merged with Klarna. Several reward cards were not recognized when used, despite being added to the app.	Digital Card Wallet – Store unlimited loyalty cards in one organized mobile wallet. Instant Card Access – Quickly open and display a loyalty card at checkout. Barcode Scanning – Scan loyalty card barcodes directly from the phone screen. Easy Card Addition – Add cards by scanning the barcode or manually entering the card number. Wallet Customization – Choose between list view and compact grid view. Privacy & Security – Store card data securely on the device without collecting or sharing personal information. Light & Dark Mode – Automatically adapt the app interface to the device's system theme.	10K+
